---

To whom it may concerns:

We receive your paper which is very interesting with some points of view. Thank you very much for sending your paper to us. We therefore send for in-depth review those papers most likely to be ultimately published in IJIT.

Papers are selected on the basis of discipline, novelty, and general significance, in addition to the usual criteria for publication in specialized topics. The journal's basic publishing standards, its editorial content, the international diversity of its authorship, and the citation data associated with it are all considered. The committee of the final thesis inspection is composed of 5 inspectors. Only the passers of the inspection voting process can be accepted when 3 out of 5 inspectors choice to accept the thesis.

Although the basic composition changes constantly, reflecting the evolution of scholarly topics. Our mission is to update IJIT coverage in technology science by identifying and evaluating promising new articles and, whenever necessary, adding articles that have become more useful.

Sincerely,

*Eugene Cohen*
